2nd Year Games Design and Programming student at University of Staffordshire

TECHNICAL SKILLS

- Languages: C++, C#, Python, HTML/CSS, JavaScript, PHP
- Game Engines: Unity, Unreal Engine
- Other Tools: Git, MySQL, SQL
- Core Skills: Gameplay Programming, Fast Prototyping

PROJECTS

Flick & Fetch | Unreal Engine 5.6 (C++, Blueprints, JetBrains Rider)

- Engineered a C++ companion AI with priority based states, player relative hovering, catch up/recovery and event driven lantern interactions.
- Built data driven lantern gameplay and authored fire/smoke VFX and Substance Designer textures; assisted with fossil mining and player movement systems.
- Collaborated across programming, art & design on a polished team production that received the Best Mechanic Award.

Game AI Systems | (UE5) + Splatoon Themed Platformer | Unity (C#)

- • Game AI: Implemented A*, Dijkstra and Jump Point Search, then combined a Blackboard, fuzzy scoring, a priority based FSM and steering behaviours into adaptive combat AI.
- • Splatoon Platformer: Built forgiving movement with jump buffering, coyote time and variable jump height; added pooled dash after Images and layered VFX, SFX, camera and UI feedback.

EDUCATION

- BSc (Hons) Computer Games Design and Programming, University of Staffordshire
- T-Level Digital Production, Design and Development , Leicester College

Experience (Reference available upon request)

Sep 2023 - Jul 2024 | T-level course placement | Junior Software Engineer

Team Lead, 3D Modelling & Animation | De Montfort University | Sidefest (316 hrs)

- **Led** team efforts on University Open Day App prototype; **coordinated 4 multidisciplinary teams (Audio, Programming, UI/UX) with Agile processes.**
- **Delivered daily/weekly progress updates;** Alongside modelling & animation, collaborated on Unity CC through animation timing & feedback loops.

Extracurricular Activities

UKIE Student Game Jam 2026 | Programmer (Unity / C#) | Shortlisted top 10 | Twin Sync

- Built synchronized dual-character control and split-screen puzzle systems in a 36 hour jam
